EDUCATION

NYU Shanghai

Bachelor of Science in Data Science, Finance Concentration, GPA: 3.58

Shanghai, China

Sept. 2025 – June 2029

EXPERIENCE

Financial Analyst

Next Group

May 2026 – Present

Ulaanbaatar, Mongolia

- Analyzing sales and COGS data using Excel, SQL, and Power BI

Administrative Assistant

Next Group — “Maybe Pop & Joy” Launch

June 2025 – Aug. 2025

Ulaanbaatar, Mongolia

- Supported pricing, cashiering, and sales during company launch phase
- Ran social media marketing and customer support for new business
- Configured operational systems and managed product stocking and inventory

Sales Analyst

Next Group

June 2024 – July 2024

Ulaanbaatar, Mongolia

- Traveled to multiple Chinese cities (Erenhot, Baoding, Tianjin, Beijing, Shanghai) to meet existing business partners
- Visited factories to assess production processes and quality standards; attended exhibitions to evaluate potential new partners
- Provided consumer-focused insights and contributed to team decision-making on product selection and business strategy

Human Resources Intern

Next Group

June 2023 – Aug. 2023

Ulaanbaatar, Mongolia

- Maintained and updated employee records across HR database, ensuring data accuracy and confidentiality

LEADERSHIP & ACTIVITIES

President

Entrepreneur Club, Orchlon International School

Sept. 2024 – June 2025

Ulaanbaatar, Mongolia

- Founded and led the school’s Entrepreneur Club, organizing fundraisers to finance a charity event at a local orphanage
- Facilitated weekly meetings on sales strategy and marketing tactics; allocated responsibilities across club members
- Personally handled the majority of the club’s planning, logistics, and execution

PROJECTS

Financing | *Next.js, FastAPI, PostgreSQL, scikit-learn, Supabase Auth*

- Built full-stack ML system that auto-categorizes personal spending from Alipay/WeChat exports using 554+ merchant rules plus a trained classifier for the rest
- Implemented TF-IDF + Logistic Regression model with calibrated-confidence review queue, evaluated with GroupKFold for honest unseen-merchant accuracy; shipped dashboard with spending overview and budget planning, live at financing-one.vercel.app

Earnio | *Next.js, Express, Supabase, SwiftUI (iOS)*

- Built UGC monetization platform connecting Mongolian Gen Z creators with brand sponsorships
- Developed full-stack system (Next.js + Express REST API, Supabase) for earnings tracking, sponsorship applications, and MNT withdrawals
- Shipped both web and native iOS app; live at earnio-mn.vercel.app, 208+ commits

ICDS Chat System | *Python, Tkinter, Ollama, TextBlob, TCP Sockets*

- Built TCP socket-based distributed chat application with LLM-powered chatbot and sentiment analysis via TextBlob
- Added multiplayer games (Snake, Tic-Tac-Toe) and emoji picker; completed as final course project
